Cyclone Gabrielle update

To all our global partners,

You may have seen the recent news broadcasts regarding Cyclone Gabrielle and the impact it is having on regions across New Zealand right now. The extent of destruction has led to a national state of emergency being declared.

This is an unprecedented weather event and has had wide-spread impact. We have experienced power outages, flooding, and landslides in some parts of the country and our teams are working closely with local authorities and civil defence to ensure the safety of all employees and families.

The key priority for us right now is ensuring all people are safe and accounted for.

During this time, you may see a slower response to communication given interruptions to normal services, and some orders will be delayed while the supply chain comes to grips with significant disruption.

Please bear with us while we work through the situation on the ground.

We will keep you updated as the situation progresses.

Kind Regards

Harry Woods

Commercial Director
